

## **Undergraduate and postgraduate courses**

**accredited by**

### **The Royal Statistical Society**

The following courses have been accredited by the Royal Statistical Society for the Academic Year 2016/17.

The list of accredited courses changes from year to year. In some cases, particularly for undergraduate courses, accreditation requires particular combinations of modules to be taken in the final year of the course.

It should be noted that accreditation offered by the Royal Statistical Society is purely voluntary. There are many excellent university courses in statistics for which the university has not sought accreditation and which therefore do not appear in this list.

Where possible, links have been provided to relevant pages on the institution's website. Please note that the links are to pages maintained by the respective institutions themselves. The Society accepts no responsibility for the accuracy of the information on those pages. However, we would appreciate being informed of any links that are found no longer to work; please email [webmaster@rss.org.uk](mailto:webmaster@rss.org.uk).
